

NGUYEN HOANG PHUC

19/10/1996

SUMMARY

About me

Engineering Manager and Solutions Architect with 8+ years building scalable, distributed systems - microservices, cloud-native infrastructure, IoT and AI-driven platforms for global enterprises. I pair hands-on technical depth with the leadership to grow high-performing teams and turn complex business needs into reliable, production-grade products.

EDUCATION & AWARD

2024 • Viettel Programming Challenge 2024

Silver medal - VTP Transportation ☐ Viettel Corporate Campus, Viet Nam
• <https://viettelfamily.com/news/thoi-su/viettel-programming-challenge-tro-lai-voi-giai-thuong-hap-dan>

2018 • Application of Algorithm Certificate

Ranked top 20th overall in the international contest ☐ SAMSUNG Lab
• Samsung Group

2018 • Engineer's Degree

Post and Telecommunications Institute of Technology ☐ Ha Noi, Viet Nam
• Major: Software Engineering

2017 • SAMSUNG Talent Program

Selected as 1 of only 13 recipients of the Scholarship from PTIT ☐ Ha Noi, Viet Nam
• SAMSUNG Vietnam Mobile R&D Center

EXPERIENCES

Present • Vietnam Maritime Commercial Joint Stock Bank (MSB)

Squad Manager

Project: AI Agentic Platform (AIAP)

Python, Multi-Agent, Memory, Guardrail

Stronger come first

AI Agentic Platform:

- Multi-Agent orchestration with intent-based routing, conversation management, and MCP tool integration
- Graph-based RAG with 6 retrieval modes - local, global, hybrid, mix, naive, and knowledge graph traversal
- Long-term **agent persistent memory** via Mem0 - graph + vector hybrid storage (FalkorDB, PostgreSQL pgvector)
- Visual Agent Builder Portal - drag-and-drop agent configuration, team workflows, tool & RAG management
- **AI Guardrail as a Service**: PII detection & redaction, jailbreak filtering, hallucination detection, prompt injection protection
- HRIS integration, web search, and extensible MCP-based tool ecosystem
- AI Gateway with semantic routing, semantic caching (vector-similarity dedup), token-aware rate limiting, multi-provider failover, prompt augmentation, and AI observability (cost & latency metrics)
- Context engineering for LLM prompt-cache maximization - stable prefix ordering, conversation **summarization & compaction**, and token-budget optimization to minimize API cost and TTFT
- Stateless refactoring & performance tuning for product-grade adoption

● Viettel Post Co., Ltd.

Department Manager

Project: Transportation Management System (TMS)

Java, Microservices, AI-agent, IoT

Stronger come first

Smart Transportation Management System:

- **Vehicle Routing Problem** solver via **Metaheuristic Algorithm** for route optimization, load planning, and **ETA prediction**
- Real-time shipment tracking to streamline logistics and reduce transportation costs
- Data analytics with actionable insights and automated reporting for decision-making
- Customization & deployment for **Laos & Cambodia** branches
11,000+ active users · 8,000+ vehicles tracked · 8K+ trips/day
120 transport partners · 8,000+ hubs/post-offices · 63/34 provinces
24/7 & 99.99% uptime SLA · 200 TPS/instance

Smart IoT Project:

- IoT platform orchestrating AI-cameras, fire protection systems, truck and warehouse sensors
- **Digital Twin System** for real-time logistics visibility and predictive analytics - exhibited at **MWC Barcelona 2025**
- Camera AI, Smart IoT Lock, Odometer OCR, GPS tracking, 24/7 Monitoring, Streaming & Playback
5,000+ sensors & other IoT devices · 3,000+ AI-cameras in 1,500 trucks
Real-time monitoring across all logistics hubs

● Viettel Post Co., Ltd.

Tech Leader (fulltime - 9 months)

Project: Warehouse Sorting System (Robot, Crossbelt, DWS)

Java, Microservices, IoT, Edge Computing

Stronger come first

Warehouse Sorting System:

- Crossbelt sorters, DWS (dimensioning, weighing, scanning), and **Robotic automation** across all Viettel Post sortation centers
- Edge Computing microservices handling **20,000+ goods per minute**
- Dynamic scenario management via Rule-based Engine
- Built core platform libraries covering data access, caching, messaging, security, and observability for all Viettel Post projects
- Customization & deployment for **Yody** customer via 400 AVG robots
- **Digital Twin** for warehouse ops - 200K+ storage slots, 5 heavy-pallet robots, 5 forklifts, 10 RFID-tracked operators - exhibited at **PARCEL+POST EXPO 2024**, RAI Amsterdam, Netherlands
5 Mega SOC · 1M+ parcels/day · 99.5%+ sort accuracy
1,900+ robots AVG · 300+ I/O telescopic lines · 4,000+ crossbelt sorters
24/7 & 99.99% uptime SLA

08/2023
|
04/2023

● Aargauische Kantonalbank

Backend Development Engineer (remote - 5 months)

Project: Endpoint Security System

Java, SQL, Microservices

Stronger come first

- Implemented **multi-tenancy** request routing with per-tenant database isolation
- Developed and maintained security system APIs using Spring MVC and MyBatis

03/2023
|
11/2019

● Viettel High Technology Industries Corporation

Backend Development Engineer (fulltime - 3 years)

Project: NFV Management and Orchestration System

Cloud Native, Java, MongoDB

Stronger come first

- Enhanced to the **99.99% uptime** tracking **1M+ data points/second** across 1,000 applications, 200 servers, and 1,000 VMs
- Flexible performance dashboards, automated alerting, and subscription-based reporting
- Clustering across ~50 microservice instances for high availability and distributed consistency
- Compiled all microservices from JIT to AOT (GraalVM), achieving **~50× faster startup** and **~5× lower memory footprint**

11/2021
|
06/2020

Aspired Inc

Mobile Application Developer (remote - 1 year 6 months)

Project: The Aspired

iOS/Android, Social, E-commerce Application

- Developed cross-platform iOS/Android application on mobile and tablet
- Worked with Jira and Agile/Scrum methodology
- Non-profit project

10/2019
|
09/2018

SAMSUNG Mobile Vietnam R&D Center

Software Engineer

Project: SAMSUNG MyFiles

Android P/Q/R, File Manager

- Developed SAMSUNG MyFiles Application on Android P/Q/R platform
- Joined via SAMSUNG Talent Program
